SCOPE OF SERVICES

## License Plate Recognition and Surveillance System Project

The City of Soledad is seeking a qualified firm that has the expertise and experience in installing security camera systems, which will provide high resolution color video, night vision capabilities, motion detection, motion based video recording, solar powered and other state-of-the-art camera surveillance technology. The system needs to allow for the viewing of live video surveillance as well as be able to recall and backup previously recorded video for review by the Police department. The City is interested in a firm that has experience in assisting municipalities with any technical issues that may arise.

The City plans on installing electronic surveillance equipment at two project sites:

1. South US HWY 101 entry/exit location on Nestles Road near Front Street; and
2. Adjoining the Water Reclamation Facility city-owned property.

### Project Site 1

The City desires to have automatic License Plate Recognition (LPR) equipment and surveillance cameras installed at one location on Front Street. Front Street is located within the city limits, and runs north and south. This street serves as a major access into the City and runs parallel to State Highway 101. Pole-mounted LPRs are to be installed on new or existing poles to capture the entrance/exit of US HWY 101 near Nestles Road and Front Street (see attached map). The installation of the LPRs will be at the recommended locations as determined by Police Chief or his designee and as approved by the Public Works Director. The City desires to install LPR's and a camera surveillance system at this location with the signal fed back to the Police Department by use of wireless infrastructure.

### Project Site 2

The Water Reclamation Facility (WRF) is a city-operated enterprise utility situated on city-owned property within an incorporated city island approximately one mile west of the main city limits. Due to its somewhat remote location, the WRF is subject to vandalism and theft. To prevent this, the City desires to install a camera surveillance system on new or existing poles at this location with the signal fed back to the Police Department by use of wireless infrastructure.
